

RUSTIC DOOR CASING AND TRIM

Our Rustic Trim and Door Casing have 3 edge shapes from which to choose:

- Bevel
- Single Bevel
- Double

The photo at right shows a side-by-side comparison of all three shapes. The trim shown is unfinished - as it comes ordered.

The photos below demonstrate actual applications of trim and door casing. The wood shown has been stained.

Single Bevel Door Casing.

Double Bevel Door Casing. The ends have been beveled by the customer.

Single Bevel Trim used with Double Bevel Door Casing. An additional bevel has been added to the trim end by the customer.

ZIA DOOR CASING AND TRIM

The Zia trim is very detailed and adaptable to any room, and it can be stained and finished using natural wood tones or accented with color to create an authentic Southwestern look.

The photo at right shows actual samples in 2 1/2" and 3 1/2" widths, unfinished - as it comes ordered.

The photos below demonstrate installations of stained Zia Door Casing and Trim.

Zia Trim used in conjunction with our Rustic Door Casing.

TRIM PACKAGES

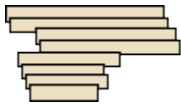

Long Random Carton:

Long Random cartons are sold by the linear foot price shown times the total number of feet in each carton. The cartons are made up of lengths as follows:

70% are 14' to 16' lengths
30% are 7-1/2' to 13-1/2' lengths.

Short Random Carton:

Short random trim cartons are sold by the listed linear foot price times the total number of feet included in each carton. Due to this low price, the quantities of short random cartons may be limited. The number in parentheses following the description in the pricing table indicates the total footage included in each carton. The tally of longer lengths (6' to 7-1/2') may be greater but not less than the following percentages:

6' to 7-1/2' = 50% of carton lengths
3' to 5-1/2' = 50% of carton lengths

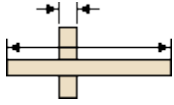

Note: 6' lengths will work as a casing leg for 6'8" doors when used with corner blocks and 8" or taller base blocks.

Eight Foot Carton:

8' trim cartons are sold by the listed linear foot price times the total number of feet included in each carton (i.e. $10 \times 8' = 80' \times$ listed price = carton price)

Specified Lengths:

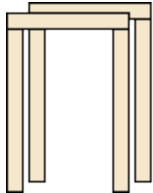

If our standard carton sizes do not suit your needs, we can produce trim in lengths from 1' to 16' in one foot increments. The price is set without discounts and charged per lineal foot.

DOOR CASING KITS

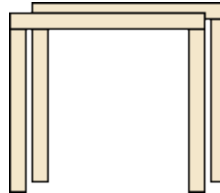

Door Casing is available as Door Kits for single and double door units. This method simplifies the ordering process. Just specify the number of door units and whether they are single or double.

Single Door Kit:

The Single Door Kit includes enough casing for one door, both sides. For example, the 6'8" Door Kit contains (4) 7' lengths and (2) 3'-6" length - enough for one door up to 3' in width.

Double Door Kit:

The Double Door Kit includes enough casing for one double door unit, both sides. For example, The 6'8" Door Kit contains (6) 7' lengths - enough for a double door up to 6' in width.
